Update: ACA Reporting COBRA File Delivery

To assist groups with ACA reporting each year, the State Health Plan (Plan) delivers COBRA data files to groups having associated individuals and their dependents who elected COBRA coverage.

This year, the Plan's COBRA file delivery is delayed due to Benefitfocus data discrepancies affecting accurate reporting of some dependents' coverage.

Benefitfocus and the Plan are working to resolve this data issue and generate accurate COBRA files for the groups with COBRA data.

The Plan will deliver these COBRA files via email as soon as possible
