State Health Plan Research — Wellness Programs

The State Health Plan is researching what employer groups are offering employees with regards to wellness programs. This wouldn't include ancillary benefits such as vision or dental, but wellness initiatives (such as medication optimization and chronic condition programs) that groups are offering outside of State Health Plan benefits.

If your group is offering a wellness program, outside of State Health Plan benefits, please respond back to this email with what you're offering to your employees.

The Plan is collecting this information to assist us with learning more about what groups are offering employees so we can get a better understanding of wellness opportunities.

We appreciate your help and participation.
